The Circuit Breaker Size for a 230 Volt Air Conditioner. Kevin, according to the specs for the air conditioner the circuit that should be installed would be a 30 amp 230 volt circuit using 10/2 cable with ground. The circuit breaker for this air conditioner circuit should be a 2-pole 30 amp breaker. More

Wiring
Single-phase motors are used to power everything from fans to shop tools to air conditioners.

Residential power is usually in the form of 110 to 120 volts or 220 to 240 volts. Wiring a motor for 230 volts is the same as wiring for 220 or 240 volts. Some motors allow both 120-volt and 240-volt wiring by

With AC current, the voltage changes direction 60 times per second (60 hertz) in the US and 50 hertz in Europe. The hot wire (black or red, typically) is the "pump" that pushes or pulls. The neutral is a path for the "pushed or pulled" current to return.
