**IXL - Multiply decimals and whole numbers (Year 6 maths) ...**

How to multiply fractions? The first step when multiplying fractions is to multiply the two numerators. The second step is to multiply the two denominators. Finally, simplify the new fractions. The fractions can also be simplified before multiplying by factoring out common factors in the numerator and denominator.

**Multiplying 2 fractions: 5/6 x 2/3 (video) | Khan Academy**

In this worksheet, we will practice the "trick" of multiplying and dividing by 10, 100, and 1,000. When you multiply by 10, you move the decimal once to the right (1.35 x 10 = 13.5) When you multiply by 100, you move the decimal twice to the right (1.536 x 100 = 153.6)
