classic, Design, Testing, and Optimization of Trading Systems Trading systems expert Robert Pardo is back, and in The Evaluation and Optimization of Trading Strategies, a thoroughly revised and updated edition of his classic text Design, Testing, and Optimization of Trading Systems, he reveals how he has perfected the programming and testing of trading systems using a successful battery of his own time-proven techniques. With this book, Pardo delivers important information to readers, from the design of workable trading strategies to measuring issues like profit and risk. Written in a straightforward and accessible style, this detailed guide presents traders with a way to develop and verify their trading strategy no matter what form they are currently using—stochastics, moving averages, chart patterns, RSI, or breakout methods. Whether a trader is seeking to enhance their profit or just getting started in testing, The Evaluation and Optimization of Trading Strategies offers practical instruction and expert advice on the development, evaluation, and application of winning mechanical trading systems.

Trading is generally far more difficult in practice than in theory. The reality is that no trade set up or individual trader or system can identify profitable trades in advance with complete certainty. In A Year of Trading, long-time trader Peter Brandt reveals the anxieties and uncertainties of trading in a diary of his 2009 trades. He explains his thought process as he searches for trading opportunities and executes them. Each trade includes charts, an analysis of the trade, and a play-by-play account of how the trade unfolds.

detail with information as to why Buffett found these attractive businesses and how he determined that they are good long-term investments. Each company will analyzed using the criteria outlined in Buffettology and Warren Buffett and the Interpretation of Financial Statements. The reader can then apply these techniques to a variety of other stocks and see if they meet Buffett's criteria. Although information about Warren Buffett's stock portfolio is available on-line, it is merely listings of the stocks Warren owns. No one else explains the criteria Warren uses to determine how and when to buy and sell. In addition this book will include stocks that are too new to be on-line. The authors will also look at a few top-performing stocks that Warren has sold in the last ten years.

## Learn the Art of Day Trading With a Practical Hands-On Approach

Comprehensive coverage of the four major trading styles Evolution of a Trader explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up

and down swings. Finally, people try Day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. Trading Basics takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. Fundamental Analysis and Position Trading discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb by 10 times their original value. Swing and Day Trading reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.

"Maria Toorpakai is a true inspiration, a pioneer for millions of other women struggling to pave their own paths to autonomy, fulfillment, and genuine personhood." --Khaled Hosseini, author of *The Kite Runner*, *A Thousand Splendid Suns*, and *And the Mountains Echoed* Maria Toorpakai hails from Pakistan's violently oppressive northwest tribal region, where the idea of women playing sports is considered haram-un-Islamic-forbidden-and girls rarely leave their homes. But she did, passing as a boy in order to play the sports she loved, thus becoming a lightning rod of freedom in her country's fierce battle over women's rights. *A Different Kind of Daughter* tells of Maria's harrowing journey to play the sport she knew was her destiny, first living as a boy and roaming the violent back alleys of the frontier city of Peshawar, rising to become the number one female squash player in Pakistan. For Maria, squash was more than liberation-it was salvation. But it was also a death sentence, thrusting her into the national spotlight and the crosshairs of the Taliban, who wanted Maria and her family dead. Maria knew her only chance of survival was to flee the country. Enter Jonathon Power, the first North American to earn the title of top squash player in the world, and the only person to heed Maria's plea for help. Recognizing her

determination and talent, Jonathon invited Maria to train and compete internationally in Canada. After years of living on the run from the Taliban, Maria packed up and left the only place she had ever known to move halfway across the globe and pursue her dream. Now Maria is well on the way to becoming a world champion as she continues to be a voice for oppressed women everywhere.
