Biology: Cycles of Life Lab Manual-A. G. S. Secondary 2006 This text explores patterns, along with ever-evolving diversity. First, the text puts the smallest unit of life--the cell--under a microscope. Students learn about the parts of cells, their chemistry, and how they function and create energy. Next, the text introduces more complex

This text explores patterns, along with ever-evolving diversity. First, the text puts the smallest unit of life--the cell--under a microscope. Students learn about the parts of cells, their chemistry, and how they function and create energy. Next, the text introduces more complex biological systems. It studies cellular reproduction, inheritance patterns, and genetics. Lastly, they examine how biological systems act upon each other in communities and ecosystems. Overall, this high-interest, low-readability text makes it easy for you to engage students who struggle with reading, language, or a learning disability. Lexile Level 850 Reading Level 3-4 Interest Level 6-12

Appealing graphics boost students' interest and understanding of chemistry Chemistry--looking at what matter is made of and how it behaves, down to the subatomic level--comes alive with this new text. With enticing, full-color graphics and page layouts that draw students in, Chemistry provides a clear, sound basis of scientific knowledge. Besides presenting chemistry fundamentals, the text offers bonus features that dispel common myths and provide examples of connections between chemistry and the environment, technology, and consumer choices. It also presents real-life problems affecting the world and their chemistry-related solutions. In addition, Investigations and Express Labs give students added exposure to chapter concepts for greater comprehension. A perfect introduction to the field of chemistry. Lexile Level 880 Reading Level 3-4 Interest Level 6-12
