Step 1 – Ensure tire pressure is correct. If you've already refilled air to proper pressure, you'll want to make sure it is reading at least the minimum amount required by the car manufacturer. Remove the valve stem cap (s). Connect tire pressure gauge and note the reading for each tire.

~~Audi A4 B7/B8: How to Reset TPMS | Audiworld~~

AUDI Direct TPMS, Tire Pressure Monitoring Sensors, are a warning system that warns a vehicle's operator of an unsafe change in the air pressure in one or more of the tires. AUDI TPMS readings are provided by pressure sensing transmitters ,TPMS, mounted inside each tire and sent to a central computer (ECU) for display on the dashboard.

~~Audi TPMS Sensors // Pre-Programmed // The TPMS ...~~

Many models from Audi are equipped with a tire pressure monitoring system that is integrated into the electronic stabilization program (ESP). This is a system that measures indirectly, has no sensors of its own in the tire and thus adds no weight and requires no maintenance. It alerts the driver in the event of pressure loss by displaying a warning on the onboard monitor.

~~Tire pressure monitoring system - Audi Technology Portal~~

Years ago the U.S. government wisely mandated tire pressure monitoring systems (TPMS) on passenger cars for all the wrong reasons. Audi takes a rather unique approach to this mandate using indirect measurement rather than individual tire sensors and the upside is significant.
