Questions & Answers - Network Walks Academy

BGP is an Interdomain routing protocol connecting different networks, and is primarily used to Interconnect different entities and organizations. So when we design

our network infra as a dual or multi homed network and providing partial or full internet routing to a downstream customer, we will use BGP.

Border Gateway Protocol(BGP) Short Interview questions and ...

1. What is the purpose of bgp ?
The main purpose of BGP is to exchange routing updates like other routing protocols, but BGP typically does not exchange individual network routes (but it technically can), it exchanges summaries of

network routes. This is because the typical use of BGP is over very large networks including the Internet.
