No two lizard species have spawned as much folklore, wonder, and myth as the Gila Monster, Heloderma suspectum, and the Beaded Lizard, H. horridum the sole survivors of an ancient group of predacious lizards called the Monstersauria. More like snakes on legs, monstersaurs are a walking contradiction: they are venomous yet don't appear to use their venom for subduing prey; their mottled patterns mingle with the broken shadows and textures of their desert and tropical dry forest habitats ...

Amazon.com: Biology of Gila Monsters and Beaded Lizards ...
Gila monster, (Heloderma suspectum), one of two species of North American venomous lizards in the genus Heloderma of the family Helodermatidae. The Gila monster (H. suspectum) was named for the Gila River basin and occurs in the southwestern United States and northern Mexico. It grows to about 50 cm (about 20 inches), is stout-bodied with black and pink blotches or bands, and has beadlike scales.

Gila monster | Description, Habitat, & Facts | Britannica

These snakes typically are diurnal, wide-foraging generalists and ingest prey headfirst. Twenty-nine percent of 447 diet items were mammals, 29% were snakes, 25% were lizards, 11% were birds, 4% ...

(PDF) Biology of Gila Monsters and Beaded Lizards, Chapter ...
Its name comes from the Gila River, where the lizards are common. Gila monsters are desert dwellers, living near washes and arroyos and in semiarid rocky regions of desert scrub or grasslands. Gila monsters also seem to prefer rocky foothills and avoid open flats and agricultural areas. They can live at elevations up to 5,000 feet (1,500 meters).

Gila monster | Smithsonian's National Zoo
Gila Monster By Laura Allard and Dr. Frey Biology and Identification The gila monster (pronounced ' Hee-la '), Heloderma suspectum, is a slow-moving species of venomous lizard found within Utah, specifically in the Southwestern corner of Washington County, near where Utah meets both Arizona and Nevada. This is the northern extent of their distribution, which stretches from Sinaloa, Mexico to Washington County, Utah and from SW New Mexico to the Colorado River.
