Bringing Nature Home is neat because it's written by an entomologist, a bug scientist. Native plants don't just provide food and habitat for native birds, mammals, and butterflies. Tallamy gets almost giddy about the cool caterpillars you'll find on the underside of an oak leaf.

Bringing Nature Home: How Native Plants Sustain Wildlife ...

As development and habitat destruction accelerate, there are increasing pressures on wildlife populations. In Bringing Nature Home, Douglas W. Tallamy reveals the unbreakable link between native plant species and native wildlife—native insects cannot, or will not, eat alien plants. When native plants disappear, the insects disappear, impoverishing the food source for birds and other animals.

Bringing Nature Home - Workman Publishing

When it comes to understanding the vital relationships between native plants and the wildlife that depends on them, Doug Tallamy is the acclaimed expert. His passion for bringing nature home by exploring these interactions and how they affect animal diversity is tireless. Gardeners have engaged in a long-term love affair with exotic and non-native plants.

Bringing Nature Home. On March 4, 2020. Ever wonder how to bring native wildflowers, grasses, trees and shrubs into your yard? BACT invited Dave Eubanks for a free community presentation on the subject. Dave is a landscape designer who works with landowners who desire the beauty and function of native plants.

Bringing Nature Home - Barrington Area Conservation Trust

Planting native plants in your own garden can make a real difference. In a developed landscape, natural areas are separated by roads, utility corridors, agricultural land, and residential neighborhoods - all potential barriers to the movement of animals, and the plants they depend on. Native plants in any of these settings can provide safe passage between areas of natural habitat for important pollinators and seed dispersers, giving the "web of life" a "web" of habitat to live in.

Bringing Nature Home - Shirley Heinze Land Trust

It culminates each spring with our annual Native Plants Sale & Festival at Gilsland Farm, featuring thousands of native plants we sourced ourselves and which are perfect for your yards and gardens. The concept for "Bringing Nature Home" comes from the book of that title by Dr. Doug Tallamy, an entomologist at the University of Delaware. Dr.

"Bringing Nature Home" | Maine Audubon
homegrown national park™ is a grassroots call-to-action to restore biodiversity and ecosystem function by planting native plants and creating new ecological networks.

HOMEGROWN NATIONAL PARK

His book *Bringing Nature Home: How Native Plants Sustain Wildlife in Our Gardens* was published by Timber Press in 2007 and was awarded the 2008 silver medal by the Garden Writer's Association. Tallamy was awarded the Garden Club of America Margaret Douglas Medal for Conservation and the Tom Dodd Jr. Award of Excellence in 2013.

review: "Bringing Nature Home" by Doug Tallamy | by Emma ...

Bringing Nature Home. As this revelatory book eloquently explains, there is an unbreakable link between native plant species and native wildlife. Most native insects cannot and will not eat alien plants. Gardeners and Restorationists have the power to make a significant contribution toward sustaining biodiversity.

Bringing Nature Home - Doug Tallamy | Prairie Moon Nursery

Bringing Nature Home is a veritable cookbook for making your yard more attractive and useful to native birds by growing the plants and food they need. If you love birds, read this book and learn how you can help restore our declining bird populations.
