Contains abstracts of papers presented at meeting of the Society for General Microbiology.

The result of an international symposium on bacterial polyhydroxyalkanoates held in 1996, this volume illustrates the range of contemporary work on the subject, including clarification of the biosynthesis of PHAs.

Volume 5 comprises the three central and eastern parishes of Kirk Braddan, Kirk Marown, and Kirk Santan. The material appears in alphabetical form with discussion of any problems of interpretation, and a listing of the elements making up the names. This volume yields name-forms and elements not found in Manx literature or dictionaries. As all but a handful of names predate the Scandinavian period (9th-13th centuries) and as documentary material from that time till the 16th century is largely absent, the testimony of place-names is important for the distribution of name elements reflecting the geography and showing patterns of settlement, whether Celtic, Scandinavian, etc, and for comparative place-name research in adjacent areas, particularly Ireland, south-western Scotland, and northern England.
