Laboratory  
Chemistry

Clinical chemistry is the area of chemistry that is generally concerned with analysis of bodily fluids for diagnostic and therapeutic purposes. It is an applied form of biochemistry. The discipline originated in the late 19th century with the

# Access Free Clinical

use of simple  
chemical reaction  
tests for various  
components of  
blood and urine. In  
the many decades  
since, other  
techniques have  
been applied as  
science and  
technology have  
advanced, including  
the use and  
measurement of
