compared to many other STEM fields. This volume explores issues pertaining to gender parity in the geosciences, and sheds light on some of the best practices that increase participation by women and promote parity. Volume highlights include:

- Lessons learned from NSF-ADVANCE
- Data on gender composition of faculty at top earth science institutions in the US
- Implicit bias and gender as a social structure
- Strategies for institutional change
- Dual career couples
- Family friendly policies
- Role of mentoring
- Career advancement for women
- Recruiting diverse faculty

Models of institutional transformation Women in the Geosciences is a valuable contribution to the existing literature on gender issues in STEM disciplines. It focuses specifically on the geosciences, with a goal to spreading awareness on the best practices for gender parity in academic geoscience departments. Geoscientists, policymakers, educators and administrators could all greatly benefit from the contents of this volume.

This textbook provides students with the core knowledge and skills required for entry-level
