The Multimodal therapy proposed by Lazarus (MMT; Lazarus, 1997) as well as its integrative counterpart constitute pluralistic approaches where one looks for individualized solutions rather than goes from a certain school or type of therapy with their advantages and limitations (Lazarus, 2008). For both types, therapeutic alliance plays a big role, flexibility is the key (rather than rigid application of pre-determined sets of procedures), and therapeutic goal is being reached by means of any ...

Integrative therapies: Integrative vs multimodal psychotherapy

Abstract. Agitated behaviour and poor coping skills in a patient with Borderline Personality Disorder who resided on a forensic psychiatry unit were treated using cognitive-behavioural and pharmacological interventions derived from a multimodal assessment. While a medication regime led to partial clinical improvement, the addition of interventions derived from the multimodal assessment over 9 wk, led to sufficient improvement in agitated behaviour, suicidal ideas and behaviour, and frequency ...
