Entrepreneurs have led economies out of downturns in the last 100 years and evidence points to this trend continuing into the future. In fact, regardless of country or economic conditions, entrepreneurial enterprises are on the rise. High-tech start-ups, where innovation, dedication, collaboration, and pure genius align into a successful enterprise, will likely see good times—if they start up right. However, many young researchers hesitate to set up their own company. Written by an electrical engineer with more than nineteen years of successful business experience, *Entrepreneurship for Engineers* covers every aspect you must master to become a savvy entrepreneur.

The author provides coverage of the fundamentals of global economies, accounting, finance, and quantitative business analysis, because ordinary engineers usually lack these necessary survival skills. Outlining a systematic preparation process that will build a great reputation in the commercial marketplace, the author answers: How to start up a company How to create product lines How to collect venture capital How to write successful R&D proposals How to apply forward thinking How to keep cash flowing in a small firm Typical MBA courses include the following curricula: economics, accounting, finance/investment, marketing, and human resources, with courses like Managerial

Communications and Quantitative Business Analysis (Applied Mathematics), and finally Strategic Management and Business Ethics. Engineering curricula seldom includes any of this. Supplying almost all the knowledge necessary for operating a corporation, above and beyond what you may find in an MBA program, this book uses an approach to business that is just as disciplined and rigorous as any approach to engineering.

Spatial planning, strongly advocated by government and the profession, is intended to be more holistic, more strategic, more inclusive, more integrative and more attuned to sustainable development than previous approaches. In what the authors refer to as the New Spatial Planning, there is a fairly rapidly evolving maturity and sophistication in how strategies are developed and produced. Crucially, the authors argue that the reworked boundaries of spatial planning means that to understand it we need to look as much outside the formal system of practices of 'planning' as within it. Using a rich empirical resource base, this book takes a critical look at recent practices to see whether the new spatial planning is having the

kinds of impacts its advocates would wish.

Contributing to theoretical debates in planning, state restructuring and governance, it also outlines and critiques the contemporary practice of spatial planning. This book will have a place on the shelves of researchers and students interested in urban/regional studies, politics and planning studies.

The OECD Regional Outlook 2016 examines the widening productivity gap across regions within countries, and the implications of these trends for the well-being of people living in different places.

Become more culturally competent in an increasingly

diverse world Recent years have seen dramatic changes to several institutions worldwide. Our increasingly interconnected, digitized, and globalized world presents immense opportunities and unique challenges. Modern businesses and schools interact with individuals and organizations from a diverse range of cultural and national backgrounds—increasing the likelihood for miscommunication, errors in strategy, and unintended consequences in the process. This has also spilled into our daily lives and the way we consume information today. Understanding how to navigate these and other pitfalls requires adaptability, nuanced cross-cultural communication, and effective conflict
