The Sunday Times bestseller Naoki Higashida met international success with THE REASON I JUMP, a revelatory account of life as a thirteen-year-old with non-verbal autism. In concise, engaging pieces, he shares his thoughts and feelings on a broad menu of topics ranging from school experiences to family relationships, the exhilaration of travel to the difficulties of speech. Aware of how mystifying his behaviour can appear to others, Higashida describes the effect on him of such commonplace things as a sudden change of plan, or the mental steps he has to take simply to register that it's raining. A story never before told and a memoir to help change our understanding of the world around us, 13-year-old Naoki Higashida's astonishing, empathetic book takes us into the mind of a boy with severe autism. With an introduction by David Mitchell, author of the global phenomenon, Cloud Atlas, and translated by his wife, KA Yoshida, Naoki Higashida was only a middle-schooler when he began to write The Reason I Jump. Autistic and with very low verbal fluency, Naoki used an alphabet grid to painstakingly spell out his answers to the questions he imagines others most often wonder about him: why do you talk so loud? Is it true you hate being touched? Would you like to be normal? The result is an inspiring, attitude-transforming book that will be embraced by anyone interested in understanding their fellow human beings, and by parents, caregivers, teachers, and friends of autistic children. Naoki examines issues as diverse and complex as self-harm, perceptions of time and beauty, and the challenges of communication, and in doing so, discredits the popular belief that autistic people are anti-social loners who lack empathy. This book is mesmerizing proof that inside an autistic body is a mind as subtle, curious, and caring as anyone else's.

An astounding new work by the author of The Mind Tree that offers a rare insight into the autistic mind and how it thinks, sees, and reacts to the world. When he was three years old, Tito was diagnosed as severely autistic, but his remarkable mother, Soma, determined that he would overcome the " problem " by teaching him to read and write. The result was that between the ages of eight and eleven he wrote stories and poems of exquisite beauty, which Dr. Oliver Sacks called " amazing and shocking. " Their eloquence gave lie to all our assumptions about autism. Here Tito goes even further and writes of how the autistic mind works, how it views the outside world and the " normal " people he deals with daily, how he tells his stories to the mirror and hears stories back, how sounds become colors, how beauty fills his mind and heart. With this work, Tito—whom Portia Iversen, co-founder of Cure Autism Now, has described as " a window into autism such as the world has never seen " —gives the world a beacon of hope. For if he can do it, why can ' t others? " Brave, bold, and deeply felt, this book shows that much we might have believed about autism can be wrong. " —Boston Globe
