What's the Difference Between a Ford 351 Windsor ...

Before the Windsor arrived, the first 351 cubic inch engine found in the Ford F-series was based on the Ford M-block, destroyed from a 400 block to make 351 cubic inches. This motor was originally intended to replace the 390 big block in the 1977 model year, although it made quite a bit less power than the 390 (offering just 163hp).

The 351 Windsor Ford Engine - Ford-Trucks.com
In addition this engine was also used on various truck and van applications for Ford, including in the F150, Bronco, and E150. The 351 Windsor was originally introduced in 1969, used in a variety of cars as mentioned in the previous paragraph. Later on, the engine was added to the truck platform and was actually used in the F150 up until 1997.

351 Windsor Engine Specs - HCDMAG.com
Heads are identical in design to 351-2V, but have larger chambers to reduce compression, may also have air injection ports. Different harmonic balancer and flexplate than 351C; 351M . Same block as 400, but crank is back to 3.50" stroke. Pistons have thicker compression height to maintain compression a 8.2:1 in the tall deck. Different harmonic balancer than 400; Production of the 400 and 351M ...

difference ...

The Ford 351W was an engine developed by the Ford Motor Company. Many of the 351W engines were produced in the Ford factory located in Windsor, Canada. Ford began manufacturing the engines in 1969 and continued using the engine in Ford vehicles until 1995. The Ford 351W was used in a variety of vehicles, from the Mustang to the F350.

Ford 351W Specs | It Still Runs

The 351 Windsor engine first appeared in 1969 and is based on a 90-degree V8 design that utilizes an overhead valve train. This design uses hydraulic lifters and is operated by a camshaft located in the center of the engine block. As the name implies, the Windsor's total cylinder volume displaces 351 cubic inches.

Specifications for a 351 Windsor Engine | It Still Runs

The 'Racing Boss 351' (not to be confused with the Ford 335 engine Cleveland-based Boss 351) is a crate engine from Ford Racing Performance Parts. The block was based on the 351 cu in (5,752 cc) Ford Windsor engine, but uses Cleveland sized 2.75 in (70 mm) main bearing journals. Deck height choices include 9.2 in (234 mm) and 9.5 in (241 mm). Maximum displacements are 4.25 in (108 mm) stroke ...

Build A 505HP Ford 351 Windsor - Hot Rod
The Ford 335 engine family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size (335 cubic inches) with room for expansion during its development. This engine family began production in late 1969 with a 351 cu in (5.8 L) engine, commonly called the 351C.
