Now available in paperback with a new preface and interview with Jessica Livingston about Y Combinator! Founders at Work: Stories of Startups' Early Days is a collection of interviews with founders of famous technology companies about what happened in the very earliest days. These people are celebrities now. What was it like when they were just a couple friends with an idea? Founders like Steve Wozniak (Apple), Caterina Fake (Flickr), Mitch Kapor (Lotus), Max Levchin (PayPal), and Sabeer Bhatia (Hotmail) tell you in their own words about their surprising and often very funny discoveries as they learned how to build a company. Where did they get the ideas that made them rich? How did they convince investors to back them? What went wrong, and how did they recover? Nearly all technical people have thought of one day starting or working for a startup. For them, this book is the closest you can come to being a fly on the wall at a successful startup, to learn how it's done. But ultimately these interviews are required reading for anyone who wants to understand business, because startups are business reduced to its essence. The reason their founders become rich is that startups do what businesses do/create value!more intensively than almost any other part of the economy. How? What are the secrets that make successful startups so insanely productive? Read this book, and let the founders themselves tell you.

Founders at Work recounts the early struggles for independence and acceptance of many of modern technology's giants, through personal interviews that are at times hilarious, at times painful, and always inspiring. As human-interest stories they will interest the same audience that enjoys reading about the Google founders in PEOPLE magazine. These stories are exceptionally interesting, because they're about the early stages, when the founders were younger and inexperienced. Most readers know startup founders only as confident millionaires. As novices trying to find their way by trial and error, they're more human, and easier for the reader to identify with.

What does it take to successfully launch and scale a startup in Asia? While much of modern business literature covers Silicon Valley and its founders, building a company in Asia is a world center of technology and innovation is a vastly different journey, and not nearly as widely covered. This book aims to change that. Asian Founders at Work is an essential compilation of in-depth, incisive interviews with over 20 top technopreneurs from the region. Authors Ezra Ferraz and Gracy Fernandez have gathered their exclusive conversations with business leaders: Min-Liang Tan (Razer), Maria Ressa (Rappler), Chatri Sityodtong (ONE Championship), Patrick Grove (ifix), and Khailee Ng (500 Startups) are just a few. Questions about early difficulties, fundraising, business pivots, strategic partnerships, exits via acquisition or IPO, and more are answered in great detail to shine a light on the founders' unique experiences. Learn directly from game-changers in their own voice. By documenting these stories, the authors have created the largest and most comprehensive record of successes to date. Whether you are an aspiring entrepreneur yourself, a business student wanting to become well-versed in international practices, or an owner looking to expand to the area, this book provides a thorough guide to the startup culture in Asia from the most knowledgeable sources possible. What You Will Learn Gain business knowledge of practices that are localized to Asia Become familiar with essential startup topics, including product development, user acquisition, recruiting, and fundraising Study individual companies and founders, and an overview of startup culture Who This Book Is For Those in the tech ecosystem in East, Southeast, and South Asia, including aspiring founders or current founders who have started their entrepreneurial journey. This book is also for people outside of Asia who have an interest in the region. Entrepreneurs or businesspeople can refer to this book as they consider expansion into the area. Researchers and readers can pick up this book if they are curious about the business landscape of Asia and want to hear directly from game-changing founders.

In European Founders at Work, several of the top European startup founders and venture capitalists are interviewed to explain their respective paths to building a successful company. It takes a similar approach to Venture Capitalists at Work and other books in Apress' elite At Work series but with a focus on the differences between building a successful company in Europe versus the U.S. These insightful interviews are presented in a way that will help readers understand the founders local or a global views, how they competed on the global scale, if and how they got funding and their main challenges and opportunities. The companies chosen to be interviewed are a mix of unique worldwide ventures: European-only ventures and even a few copycats of already-proven concepts. As such, it provides a balanced view on the European scene. This mix also includes companies that started in Europe and moved to the U.S., companies who went IPO in their country of origin, companies with European venture capital backing, and companies that bootstrapped their way to success. Foreword by Saul Klein, Founder of LOVEFiLM and The Accelerator Group. Super Founders uses a data-driven approach to understand what really differentiates billion-dollar startups from the rest—revealing that nearly everything we thought was true about them is false! Ali Tamaseb has spent thousands of hours manually amassing what may be the largest dataset ever collected on startups, comparing billion-dollar startups with those that failed to become one!30,000 data points on nearly every factor: number of competitors, market size, the founder's age, his or her university's ranking, quality of investors, fundraising time, and many, many more. And what he found looked far different than expected. Just to mention a few: Most unicorn founders had no industry experience; There's no disadvantage to being a solo founder or to being a non-technical CEO; Less than 15% went through the test of time; most startups exit as quickly as they enter. In Gamers at Work: Stories Behind the Games People Play, the countless challenges of building successful video-game developers and publishers in this unstable industry are explored through interviews containing entertaining stories, humorous anecdotes, and lessons learned the hard way. Peter Seibel interviews 15 of the most interesting computer programmers alive today in Coders at Work, offering a companion volume to Apress's highly acclaimed best-seller Founders at Work by Jessica Livingston. As the words [at work] suggest, Peter Seibel focuses on how his interviewees tackle the day-to-day work of programming, while revealing much more, like how they became great programmers, how they recognize programming talent in others, and what kinds of problems they find most interesting. Hundreds of people have suggested names of programmers to interview on the Coders at Work web site: www.codersatwork.com. The complete list was 284 names. Having digested everyone's feedback, we selected 15 folks who've been kind enough to agree to be interviewed: Frances Allen: Pioneer in optimizing compilers, first woman to win the Turing Award (2006) and first female IBM fellow Joe Armstrong: Inventor of Erlang Joshua Bloch: Author of the Java collections framework, now at Google Bernie Cosell: One of the main software guys behind the original ARPANET IMPs and a master debugger Douglas Crockford: JSON founder, JavaScript architect at Yahoo! L. Peter Deutsch: Author of Ghostscript, implementer of Smalltalk-80 at Xerox PARC and Lisp 1.5 on PDP-1 Brendan Eich: Inventor of JavaScript, CTO of the Mozilla Corporation Brad Fitzpatrick: Writer of LiveJournal, OpenID, memcached, and Perlbal Dan Ingalls: Smalltalk implementor and designer Simon Peyton Jones: Coinventor of Haskell and lead designer of Glasgow Haskell Compiler Donald Knuth: Author of The Art of Computer Programming and creator of TeX Peter Norvig: Director of Research at Google and author of the standard text on AI Guy Steele: Coinventor of Scheme and part of the Common Lisp Gang of Five, currently working on Fortress Ken Thompson: Inventor of UNIX Jamie Zawinski: Author of XEmacs and early Netscape/Mozilla hacker

"Deeply reported and bracingly written, this book is an indispensable guide to modern innovation and entrepreneurship." "Walter Isaacson, New York Times bestselling author of Code Breaker A definitive, deeply reported look at the origin of PayPal and its founding team, including Elon Musk, Peter Thiel, Reid Hoffman, Max Levchin, and others whose stories have never before been told. They have defined the modern world. This experience defined them. Today, PayPal's founders and earliest employees are considered the technology industry's most powerful network. Since leaving PayPal, they have formed, funded, and advised the leading companies of our era, including Tesla, Facebook, YouTube, SpaceX, Yelp, Palantir, LinkedIn, Pinterest, and Airbnb, among many others. They defined 21st-century innovation and entrepreneurship!and still shape that template today. Their names stir passions; they're as controversial as they are admired. Yet for all their influence, the story of how they first connected and cut their start-up teeth has gone untold. Before igniting the commercial space race or jumpstarting social media's rise, they were the unknown creators of a scrappy online payment company called PayPal. It would grow to become one of the world's foremost companies, but that success was anything but certain. From the outset, the team faced industry skeptics, bruising competition, internal strife, the emergence of widespread online fraud, and the devastating dot-com bust of the 2000s. In The Founders: The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley, award-winning author and biographer Jimmy Soni pulls back the curtain on PayPal's turbulent early days. With hundreds of interviews and unprecedented access to thousands of pages of internal material, Soni shows how the seeds of so much of what shapes our world today!fast-scaling digital start-ups, cashless currency concepts, mobile money transfer!were planted two decades ago. He also reveals the countless individuals whose stories never made the front pages nor earned banner headlines!but whose contributions were vital to PayPal's success. The Founders is a story of iteration and inventiveness, one that casts a long and powerful shadow over modern life. Jimmy Soni's narrative offers deep insight into how this once-in-a-generation assemblage of talent came to work together and how that collaboration changed our world forever.
