Ask Craig Cushman which frequency you should use for your fish finder, and he will answer with ... that sends and receives signals over a bandwidth of 85 to 135 kHz. "This frequency band is ...

An updated reference for power and sail boaters surveys the latest developments in safety systems, marine electronics, radar, and communications, and federal laws and regulations, and includes information on tides, currents, weather, and navigation.

Maritime navigation has rapidly developed since the publication of the last edition of the title with methods of global position fixing for shipping becoming standardized. As in the previous two editions, this edition will provide a sound basis for the understanding of modern navigation systems and brings the student or professional up-to-date with the latest developments in technology and the growing standardization of maritime navigation techniques. Developed with close scrutiny from the US Merchant Marine Academy and the major maritime navigation centres in the UK, out-dated techniques have been replaced by an expanded section on the now standard Navstar GPS systems and the Integrated Nav. In addition, a new chapter on the application of electronic charts will also be included, as well as problems at the end of each chapter with worked solutions.

These Christian fish symbols (Ichthus) are foil-edged, embellished with the name Jesus at the center. This symbol was adopted by Christians in the early church. Use them as rewards or reminders of the fact that Jesus was a "fisher of men." Approximately 13/4" x 1." Six sheets, 8 stickers per sheet; 48 stickers per package.

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

Recommended by the medical profession worldwide, this revolutionary stand allows everyone to have hands-free reading anywhere and at any time, enabling perfect posture while working at a desk, cooking, studying or sitting up in bed. READEZY has ultimate stability and can sensibly fold flat into a neat and compact package. No more awkward positions, eyestrain, tired arms or neck and back pain.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
