Hitchens, of course, is right: god is not great. Made up, mythological fantasy stories and creature can be great, as proof of human creativity and for sheer entertainment value. Gods don't fall in that category, as less intellectually endowed Homo Not-Really-Sapiens tend to take them seriously - and then it gets really ugly.

¶Thus, though I dislike to differ with such a great man, Voltaire was simply ludicrous when he said that if god did not exist it would be necessary to invent him. The human invention of god is the problem to begin with.¶ ¶ Christopher Hitchens, God Is Not Great: How Religion Poisons Everything

God Is Not Great Quotes by Christopher Hitchens

In ¶God is not Great¶ Christopher Hitchens undertook an unrelenting attack on religion. From the opening page he showed his approach with the example of the otherwise apparently admirable Christian lady Mrs Jean Watts, who played a pleasant part in Hitchens childhood until she over-stepped the mark and suggested that God made vegetation green so it would be easier on the human eye.

God Is Not Great: How Religion Poisons Everything is a 2007 book by the author and journalist Christopher Hitchens (1949–2011) in which he criticises religion. It was published by Atlantic Books in the United Kingdom as God Is Not Great: The Case Against Religion .

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

Whether you're a lifelong believer, a devout atheist, or someone who remains uncertain about the role of religion in our lives, this insightful manifesto will engage you with its provocative ideas. Hitchens describes his tumultuous journey from atheist to Christian and the moral reasoning that caused his conversion.

Throughout history, arguments for and against the existence of God have been largely confined to philosophy and theology, while science has sat on the

sidelines. Despite the fact that science has revolutionized every aspect of human life and greatly clarified our understanding of the world, somehow the notion has arisen that it has nothing to say about the possibility of a supreme being, which much of humanity worships as the source of all reality. This book contends that, if God exists, some evidence for this existence should be detectable by scientific means, especially considering the central role that God is alleged to play in the operation of the universe and the lives of humans. Treating the traditional God concept, as conventionally presented in the Judeo-Christian and Islamic traditions, like any other scientific hypothesis, physicist Stenger examines all of the claims made for God's existence. He considers the latest Intelligent Design arguments as evidence of God's influence in biology. He looks at human behavior for evidence of immaterial souls and the possible effects of prayer. He discusses the findings of physics and astronomy in weighing the suggestions that the universe is the work of a creator and that humans are God's special creation. After evaluating all the scientific evidence, Stenger concludes that beyond a reasonable doubt the universe and life appear exactly as we might expect if there were no God. This paperback edition of the New York Times bestselling hardcover edition contains a new foreword by Christopher Hitchens and a postscript by the author in which he responds to reviewers' criticisms of the original edition.

"Science can't explain the complexity and order of life; God must have designed it to be this way." "God's existence is proven by scripture." "There's no evidence that God doesn't exist." "God has helped me so much. How could none of it be true?" "Atheism has killed more people than religion, so it must be wrong!" How many times have you heard arguments like these for why God exists? Why There Is No God: Simple Responses to 20 Common Arguments for the Existence of God provides simple, easy-to-understand counterpoints to the most popular arguments made for the existence of God. Each chapter presents a concise explanation of the argument, followed by a response illustrating the problems and fallacies inherent in it. Whether you're an atheist, a believer or undecided, this book offers a solid foundation for building your own inquiry about the concept of God.

Literary ombudsman John Crace never met an important book he didn't like to deconstruct. From Salman Rushdie to John Grisham, Crace retells the big books in just 500 biting satirical words, pointing his pen at the clunky plots, stylistic tics and pretensions to Big Ideas, as he turns publishers' golden dream books into dross. In the grand tradition of Tom Lehrer and Stan Freberg, Crace takes the books that produce the most media hype and retells each story in its author's inimitable style. Philip Roth, Don DeLillo, Margaret Drabble, Paul Auster, Alice Sebold, John Updike, Tom Wolfe, Ruth Rendell, A.S. Byatt, John LeCarre, Michael Crichton and Ian McEwan all emerge delightfully scathed in this book that makes it easy to talk knowingly about books you've never bothered to read or, for that matter, should have.

Presents excerpts on the subject of religion from the writings of such notable non-believers as John Stuart Mill, Karl Marx, Charles Darwin, Mark Twain, H. L. Mencken, Albert Einstein, Richard Dawkins, and Salman Rushdie.
