Secret Message Worksheet 1 - tlsbooks.com

To decode a message, you do the process in reverse. Look at the first letter in the coded message. Find it in the bottom row of your code sheet, then find the letter it corresponds to in the top row of your code sheet and write it above the encoded letter. This can be confusing at first! It takes practice to be a fast decoder.

Writing Secret Messages Using Ciphers | Scholastic | Parents

It uses a simple method of Cryptography (the study of secret messages) called "Key Offset". Each letter in your message is moved forward in the alphabet a number of places (based on your Key Value) Try typing in "abcd" and use a Key Value of 1, and you will get the idea ... I did say it was simple! Just don't tell anyone how it works, or they may figure out how to decode your message!

Secret Messages - MATH

To decode a message, the recipient must have the encoded message and a key map. The key map assigns each letter to a specific value for key). A message is decoded by converting each letter, from left to right, to their corresponding value based on the key map, and then from the resulting number take the sum of each consecutive pair of digits (from left to right) to form the digits of a new number.
