Lifetime Updates is an industry-first feature which allows you to receive verified self assessment updates, ensuring you always have the most accurate information at your fingertips.

Every year the US federal government will spend roughly 100 billion dollars through competitive IDIQ (Indefinite Duration Indefinite Quantity) contracts. When you add in contracts awarded by State governments and commercial organizations using very similar processes you're looking at 700 billion dollars' worth of business. Getting a slice of that pie depends on how well you manage the contracting project. This is because IDIQs are essentially empty contract structures which then require a second round of winning task orders. For contracts with the government, this two-step structure which is specified in law and regulation, has specific pitfalls and opportunities which are rarely the subject of contract and project management training. Salesky's coaching style talks you through the specific challenges in the startup, management, and closing of the IDIQ. This book gives a pragmatic and best-practice description of the entire life cycle of this type of contract offering you the "inside advisor" you need to help you through the pragmatics issues of clients', performers', and bosses' expectations.

Road asset management is one of the top priorities of the Central Asia Regional Economic Cooperation (CAREC) Transport and Trade Facilitation Strategy 2020. The implementation of performance-based road maintenance contracts (PBCs)—an essential element of road asset management—promotes effective and efficient maintenance of road networks. Well-designed PBCs keep roads in predefined good condition at relatively low cost. This guide aims to help policy makers in CAREC member countries understand and implement PBCs. After a brief history of the development of PBCs, it discusses the various types of PBCs and their relative advantages and disadvantages. It highlights PBC implementation in selected developed, developing, and transitional countries, including CAREC member countries, to illustrate best practices.

This report describes how to prepare family housing maintenance contracts for U.S. Army installations. Guidance for developing and preparing each section of the contract and specifications which the reader may use to reduce contract preparation time are provided. (Author).
