Community colleges serve more students than any other institutional type in the United States, and internationalization is an inherent component of community colleges that advances student knowledge, facilitates student success, and serves the needs of local communities. As most community college students do not enroll in four-year institutions, their only opportunity for international experience is while they are in community college. Study Abroad Opportunities for Community College Students and Strategies for Global Learning provides innovative insights into international study and education abroad through community colleges, while discussing the value of adding study abroad programs to two-year institutions. This publication examines community colleges' contributions in a local society, study abroad opportunities, peacebuilding, international education, and risk management. Designed for administrative professionals, community college leaders, educators, academicians, and researchers, this book covers topics centered on study abroad programs at diverse community colleges.

This book offers a comprehensive and critical guide to research and practice in the field of arts education and conflict management. The DRACON project explores the relationship between drama and conflict transformation. This international, interdisciplinary and comparative action research project, begun in 1996, is aimed at improving conflict management and transformation among adolescent school students using the medium of educational drama. The book reports on the underpinning principles, and on action research practice in Malaysia, Sweden and Australia. The strategies and techniques, which were revolutionary when first introduced, are now tried and tested. The book chronicles the history, successes, opportunities and challenges of the original 10-year project, and brings the story up to date by highlighting some of its many legacies and resulting influences around the world. This book will benefit researchers, academics and graduate students in Education, the Social Sciences, Dispute Resolution and the Performing Arts.

Conflict and Communication introduces students to important theories, key concepts, and essential research in the study of conflict, along with practical skills for managing conflict in their daily lives. Author Fred E. Jandt illustrates how effective communication can be used to manage conflict in relationships and within organizational and group contexts. Along with foundational coverage of conflict styles, mediation, and negotiation skills, the text also features new and emerging models of conflict management, including chapters examining the challenges of conflict between cultures, a chapter on family and organizations, information on both face-to-face and online bullying, a detailed step-by-step guide for mediation, and more emphasis on online dispute resolution.

Cultural Impact on Conflict Management in Higher Education shares information regarding conflict management and resolution in higher education from a global perspective. In this book, we introduced many conflict resolution methods from different regions in the world. You can borrow some successful strategies and examine the differences and similarities between contexts. The book shares a conflict resolution model which may direct the reader to start thinking about addressing and managing conflicts from different levels of organizations. This book is a collective work of authors coming from all over the world. We chose higher education as the context because it is a place where diverse thoughts, perspectives, and people come together. Because of the potential richness of diversity on a college campus, the opportunity for conflicts occurs. Managing conflict does not work when there is a "one-way only approach/model" for addressing conflict. Some conflict resolution encompasses multiple dimensions: (a) one's personal beliefs or beliefs about an issue; (b) an individual's personal history in terms of how the conflict was perceived as something to be discussed or not; (c) work culture of the conflict where if "one has a conflict," the person or unit is messing up or there is a problem person; (d) the unconscious strategies of "face saving" (trying to maintain one's image) present; (e) social hierarchies or relationships; and (f) the diversity dimensions and issues that may be present.
