Institute of Transportation Engineers, Trip Generation , 4 th edition (Washington, DC: 1987), p. 1,199. 5 "The coefficient of determination [R2] is defined as the percent of the variance in the number of trips associated with the variance in the size of the independent variable" (ITE 1997, vol. 3, p. 19). An R2 of zero shows complete

~~Truth in Transportation Planning - Donald Shoup~~
Kevin Hooper, Strategic Projects | Institute of Transportation Engineers Kevin is a part-time contractor with ITE. He directed development of the Trip Generation Manual 10th Edition Supplement and updates to ITETripGen. He served a similar role for the Parking Generation Manual, 5th Edition released in 2019.

"Parking Generation Manual, 5th Edition is a publication of the Institute of Transportation Engineers (ITE). Parking Generation Manual is an educational tool for planners, transportation professionals, zoning boards, and others who are interested in estimating parking demand of a proposed development. Parking Generation Manual includes a complete set of searchable electronic files including land use descriptions and data plots for all available combinations of land uses, time periods, independent variables, and settings. Data contained in Parking Generation Manual are presented for informational purposes only and do not include ITE recommendations on the best course of action or the preferred application of the data. The information is based on parking generation studies submitted voluntarily to ITE by public agencies, developers, consulting firms, student chapters, and associations."--Provided by publisher.

A multi-disciplinary approach to transportation planningfundamentals The Transportation Planning Handbook is a comprehensive,practice-oriented reference that presents the fundamental conceptsof transportation planning alongside proven techniques. This newfourth edition is more strongly focused on serving the needs of allusers, the role of safety in the planning process, andtransportation planning in the context of societal concerns,including the development of more sustainable transportationsolutions. The content structure has been redesigned with a newformat that promotes a more functionally driven multimodal approachto planning, design, and implementation, including guidance towardthe latest tools and technology. The material has been updated toreflect the latest changes to major transportation resources suchas the HCM, MUTCD, HSM, and more, including the most current ADAaccessibility regulations. Transportation planning has historically followed the rationalplanning model of defining objectives, identifying problems,generating and evaluating alternatives, and developing plans.Planners are increasingly expected to adopt a moremulti-disciplinary approach, especially in light of the risingimportance of sustainability and environmental concerns. This bookpresents the fundamentals of transportation planning in amultidisciplinary context, giving readers a practical reference forday-to-day answers. Serve the needs of all users Incorporate safety into the planning process Examine the latest transportation planning softwarepackages Get up to date on the latest standards, recommendations, andcodes Developed by The Institute of Transportation Engineers, thisbook is the culmination of over seventy years of transportationplanning solutions, fully updated to reflect the needs of achanging society. For a comprehensive guide with practical answers,The Transportation Planning Handbook is an essentialreference.

The new student edition of the definitive reference on urbanplanning and design Planning and Urban Design Standards, Student Edition is theauthoritative and reliable volume designed to teach students bestpractices and guidelines for urban planning and design. Edited from the main volume to meet the serious student's needs,this Student Edition is packed with more than 1,400 informativeillustrations and includes the latest rules of thumb for designingand evaluating any land-use scheme--from street plantings to newsubdivisions. Students find real help understanding all thepractical information on the physical aspects of planning and urbandesign they are required to know, including: * Plans and plan making * Environmental planning and management * Building types * Transportation * Utilities * Parks and open space, farming, and forestry * Places and districts * Design considerations * Projections and demand analysis * Impact assessment * Mapping * Legal foundations * Growth management preservation, conservation, and reuse * Economic and real estate development Planning and Urban Design Standards, Student Edition providesessential specification and detailing information for various typesof plans, environmental factors and hazards, building types,transportation planning, and mapping and GIS. In addition, expertadvice guides readers on practical and graphical skills, such asmapping, plan types, and transportation planning.

The most effective way to participate in land stewardship and environmental management is to get involved in the review of proposed developments. In smaller communities, this review is primarily done by a planning board or commission made up of volunteer members, guided by professionals in certain aspects such as traffic, historic preservation, civil engineering, water supply, and wastewater disposal. In larger communities, professional planning staff with the assistance of municipal engineers conducts the review, which will then be presented to the planning commission. In either case, everyone--officials, volunteers,

reviewers, consultants, neighbors, and the public in general—needs to know what is being proposed. The site plan itself is the primary tool for understanding the proposal. Environmental review is not an easy task, even for consultants and professional planners. There is a need for a general guide that presents the design, infrastructure, and environmental issues to address, what a reviewer needs to know about these issues, and how to interpret them. The book points the reader to accessible, low-cost resources to aid in the review process. In these times of climate change, rising populations, energy challenges, and economic turmoil, there is a real need for development to occur in as efficient and environmentally-responsible a manner as possible. Citizen review is a critical step in the approval, alteration, or denial of site plans for land subdivision and new development. Hence, informed participants in the review processes are more important than ever. This book is designed to assist professional archaeologists, environmental consultants, and others interested in construction, development and other physical land alteration that must go before some sort of review board. The book is also suitable for college undergraduates and graduate students in fields that bring them into environmental development of sites. And it is useful for neighbors and other members of the public who want to understand proposed land development in their neighborhood.
