This Handbook offers a critical analysis of the major theoretical and empirical issues in public policy and public administration in China. Investigating methodological, theoretical, and conceptual themes, it provides an insightful reflection on how China is governed.

This book investigates patterns of fragmentation and coherence in the international regulatory architecture of public procurement. In the context of the major international instruments of procurement regulation, the book studies the achievement of social and labour policies, the most controversial and problematic instrumental uses of public procurement practices. This work offers an innovative comparative approach, discussing the ways in which the different international instruments-namely the EU Procurement Directives, the WTO Agreement on Government Procurement, the UNCITRAL Model Law and the World Bank's Procurement Framework-are able to implement labour and social purposes and, at the same time, ensure a regulatory balance with the principles of efficiency and non-discrimination. Scholarly, rigorous and timely, this will be important reading for international trade lawyers and procurement practitioners.

Deeper Insight into Nigeria's Public Administration is a collection of a wider range of Public Administration topics to which scholars and authors have devoted attention in recent time. Here is a lucidly written and presented book, which selective scholars, researchers and readers would find indispensably useful to procure for personal and institutional libraries.

The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world. Growing numbers of educators and professors look to the six bimonthly issues to: deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement.

With opinion surveys being used increasingly to measure the public response to governmental initiatives, this book that helps clarify the basics of survey research as they apply to public administration will be welcomed. It is organized around the fundamental stages of the research process - planning, design, implementation, analysis and presentation of data. David H Folz presents practical illustrations and does not assume the reader to have an extensive background in statistics. Thorough coverage of the use of computers in data analysis is provided, together with illustrations of SPSS screens.

Public administration ensures the development and delivery of the essential public services required for sustaining modern civilization. Covering areas from public safety and social welfare to transportation and education, the services provided through the public sector are inextricably part of our daily lives. However, mandatory budgetary cuts in recent years have caused public administrators to radically re-think how they govern in the modern age. In this Very Short Introduction Stella Theodoulou and Ravi Roy offer practical insight into the major challenges confronting the public sector in the globalized era. Tackling some of the most hotly debated issues of our time, including the privatization of public services and government surveillance, they take the reader on a global journey through history to examine the origins, development, and continued evolution of public administration. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Behavioural sciences help refine our understanding of human decision-making. Their insights are immensely relevant for policy-making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly, governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy-making meets behavioural sciences, effective and low-cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally-informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. Nudge and the Law takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation by focusing on the challenges and opportunities it may offer to EU policy-making and beyond.

The Nigerian state has been oil-rich for decades, and yet perennially incapable of converting its oil resources into wealth for ordinary Nigerians. Adeoye O. Akinola tackles this [vexed] oil question by examining the political economy of efforts to deregulate the Nigerian downstream oil industry. Focusing on themes of globalization and democratization, this book considers how a resource-rich developing country like Nigeria can exploit the opportunities of globalization and navigate the pressures of democratization and the challenges of liberalization. Pairing sophisticated theoretical frameworks with firsthand accounts from actors in the oil industry, this book identifies the root causes of Nigeria's development struggles and offers practical policy solutions for successfully deregulating the oil sector. For public officials and policymakers as well as researchers, this book offers a critical new lens on the future of natural resource management in Nigeria and the Global South.

The Comprehensive Economic and Trade Agreement between the EU and Canada (CETA), proposed Transatlantic Trade and Investment Partnership between the EU and the US (TTIP), and the plurilateral Trade in Services Agreement (TISA) between the EU and 22 other States have sparked a great deal of academic and public interest. This edited collection brings together leading experts in the field of international economic law to address the legal complexities of these treaties and provide an explanation of their core principles. In the first two chapters, this book examines changing conceptions of international economic law and the main motivations for negotiating mega-regional agreements. In nine further contributions, international experts examine sectoral issues such as the trade, investment, and dispute settlement procedures envisaged in these 'mega-regional' agreements. The book goes on to consider the progress made in intellectual property protection, the problems associated with data protection, human rights, labour, and environmental standards, issues of transparency and legitimacy, and the relationship between CETA, TTIP, and TISA on the one hand and EU law on the other. It concludes with four chapters that discuss globalization and other fundamental questions surrounding these mega-regional agreements from economic, political science, and legal perspectives.

Participatory governance has a long history in India and this book traces historical-intellectual trajectories of participatory governance and how older Western discourses have influenced Indian policymakers. While colonial rulers devolved power to accommodate dissenting voices, for independent India, participatory governance was a design for democratizing governance in its true sense. Participation also acted as a vehicle for localizing governance. The author draws on both Western and non-Western theoretical treatises and the book seeks to conceptualize localizing governance also as a contextual response. It also makes the argument that despite being located in different socio-economic and political milieu, thinkers converge to appreciate localizing governance as perhaps the only reliable means to democratize governance. The book aims to confirm this argument by reference to sets of evidence from the Indian experience of localizing governance. By attempting a genealogy of participatory governance in the West and in India, and an empirical study of participatory governance in India, the book sheds light on the exchange of ideas and concepts through space and time, thus adding to the growing body of literature in the social sciences on 'conceptual flow'. It will be of interest to political scientists and historians, in particularly those studying South Asia.
