The LEED AP BD+C V4 Exam Complete Study Guide aims to provide deep insight into the LEED requirements and the certification process and helps the reader to learn, rather than to memorize, all the essential information for the exam. This book is designed to be the only resource a candidate would need to successfully pass the exam.

A new and incisive analysis of the political viability of human rights, with an in-depth investigation of its largest violation: world hunger. Gonzalez-Pelaez develops John Vincent's

theory of basic human rights within the context of the international political economy and demonstrates how the right to food has become an international norm enshrined within international law. She then assesses the international normative and practical dimensions of hunger in connection with international trade and poverty. Using the society of states as the framework of analysis, she explores the potential that the current system has to correct its own anomalies, and examines the measures that can move the hunger agenda forward in order to break through its current stagnation.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more

fun to discover, as all of these delightful stories make abundantly clear.

In 1947 Vaino J. Holopainen (Waino) and Roy E. Handy Jr. of the small town of Hubbardston, Massachusetts developed the world's first backhoe. This revolutionary invention that could dig and load by swinging side to side, was also the world's first all hydraulically actuated and controlled machine for digging. Vaino and Roy then formed Wain-Roy Corporation. Their grassroots contribution to the earth moving industry lead to the development of twenty-six major backhoe related break-through designs, including the tractor loader backhoe, which formed the worldwide multi-billion-dollar industry that we know today. The amazing

story of Wain-Roy and the invention of the backhoe is one of inspiration, struggle, genius, success, theft and failure. Credit for the backhoe is often given to other larger outfits who no-doubt fueled the rise of its widespread use. Few people alive still remember the greatest triumphs and failures of the true inventors and innovators of first backhoe and the first all-hydraulic digger. Authors Lee Horton and Dave Willens, two engineers from Central Massachusetts, wanted to capture this fascinating history before it was lost to time.

Enterprise Java developers must achieve broader, deeper test coverage, going beyond unit testing to implement functional and integration testing with systematic

acceptance. Next Generation Java™ Testing introduces breakthrough Java testing techniques and TestNG, a powerful open source Java testing platform. Cédric Beust, TestNG's creator, and leading Java developer Hani Suleiman, present powerful, flexible testing patterns that will work with virtually any testing tool, framework, or language. They show how to leverage key Java platform improvements designed to facilitate effective testing, such as dependency injection and mock objects. They also thoroughly introduce TestNG, demonstrating how it overcomes the limitations of older frameworks and enables new techniques, making it far easier to test today's complex software systems. Pragmatic and results-focused, Next Generation Java™ Testing will help Java developers build more robust code for today's

mission-critical environments. This book illuminates the tradeoffs associated with testing, so you can make better decisions about what and how to test. Introduces TestNG, explains its goals and features, and shows how to apply them in real-world environments. Shows how to integrate TestNG with your existing code, development frameworks, and software libraries. Demonstrates how to test crucial code features, such as encapsulation, state sharing, scopes, and thread safety. Shows how to test application elements, including JavaEE APIs, databases, Web pages, and XML files. Presents advanced techniques: testing partial failures, factories, dependent testing, remote invocation, cluster-based test farms, and more. Walks through installing and using TestNG plug-ins for Eclipse, and IDEA. Contains

extensive code examples Whether you use TestNG, JUnit, or another testing framework, the testing design patterns presented in this book will show you how to improve your tests by giving you concrete advice on how to make your code and your design more testable.

Sample Text

This is the third book from Scottish Author, Lauren Cullen. Once again we travel through a year in time to explore the difficult emotions of complex situations, relationships, politics, philosophy and life. Break the chain is about loving yourself and letting go of things out of your control. The cover is again created by illustrator and artist, Zoe Jackson.
