The Manager'S Guide To Organizational Engineering Explains How Individuals And Group Behavior Can Be Understood, Measured, Predicted, And Guided With A High Degree Of Accuracy. The Methods Outlined In This Title Are Simple, Fast And Reliable, And Produce Results That Are Visible And Significant. The Technology Underlying Organizational Engineering Combines Information Processing Theory And Sociology, Rather Than Psychology. Information Processing Theory Allows Probable Behavior To Be Estimated With A High Degree Of Specificity; Sociology - The Science Of Group Behavior - Is Used To Provide Tools That Allow The Behaviors To Be Guided In The Desired Direction. The Process Is Done With The Active Participation And Concurrence Of The Groups Involved.

Despite the advent of new methodologies and powerful tools, many projects continue to fail even when applying the well-accepted criteria of successful projects. These dismal results beg the question: If new methodologies and tools don't really impact project results, what does? Studies from major think

Offering a quick read on the basics of performance reviews, this guide features short, informally written chapters, bulleted lists, self-examinations, seven types of sidebars, and chapter-ending checklists of important points.

There's a saying that people don't leave companies, they leave managers. Management is a key part of any organization, yet the discipline is often self-taught and unstructured. Getting to the good solutions of complex management challenges can make the difference between fulfillment and frustration for teams, and, ultimately, the success or failure of companies. Will Larson's *An Elegant Puzzle* orients around the particular challenges of engineering management--from sizing teams to technical debt to succession planning--and provides a path to the good solutions. Drawing from his experience at Digg, Uber, and Stripe, Will Larson has developed a thoughtful approach to engineering management that leaders of all levels at companies of all sizes can apply. *An Elegant Puzzle* balances structured principles and human-centric thinking to help any leader create more effective and rewarding organizations for engineers to thrive in.

An Introduction to Organisational Behaviour for Managers and Engineers: A Group and Multicultural Approach gives a comprehensive overview of how organisations work, with a special focus on group and team working, and issues of diversity and intercultural management. This second edition has been updated throughout, drawing on the latest literature, along with: a new chapter on organisational change, a process which all managers and engineers will encounter on the job; case studies and illustrations showing theories in action; more cross-referencing between chapters, showing how topics are interlinked. This concise textbook not only provides a practical introduction to organisational behaviour for management students, but is also specifically geared towards the needs of engineering students and professionals.

Supervisory Skills for the Technical Manager: A Guide to Success focuses exclusively on the dynamics of being a technical manager such as a scientist, programmer, or engineer. An R&D environment demands modified management techniques and this book explores how to do so. Drawing on years of experience to provide technical managers with various tools and ways to apply them in supervisory situations, this essential title includes exercises, templates and checklists to accelerate their uses and applications on the job. In addition, case studies are included throughout to thoroughly explain and explore the concepts discussed. Key topics include handing the transition to supervising others in research and development, the characteristics needed to motivate personnel in a R&D environment as compared to other areas of business are detailed. The pitfalls and challenges of managing technical personnel, how delegating can build an effective team that can produce superior results, and how to monitor the work of previously independent personnel are also discussed.
