Re: 470-485 mercruiser weights? I don't know for sure but I bet the head weighs as much as the block. I just lugged the leg down to the driveway this afternoon I would bet it weighs about 70 lbs. Say the bell housing weighs about the same so 140 for the drive.

470-485 mercruiser weights? marineengine.com

The 470 featured a cast aluminum engine block designed by Mercury Marine, the name Kiekhaefer's company had taken in 1969, and the block was mated with an iron cylinder head from the Ford 460 V-8 engine. The same engine block was used in several other MerCruiser

Online Library Mercruiser 470 Engine Weight

Many customers ask about replacing the 470 engine with the current 3.0L engine since they are also an inline configuration. The problem with this is that the 3.0L makes approximately 135 Hp & 180 Lb-Ft of torque where the 470 made 190 Hp and approximately 275 Lb-Ft of torque. The 3.0L engine is simply too small and does not make enough torque.

The previous answers are fine, but MerCruiser's engine oil that you can buy in quarts (I purchase it in bulk 55 gal. drums for my marina) is actually 25W40 oil. This is because a boat engine sees around 70 to 80% load ALL THE TIME when it is running vs. a car engine that sees anywhere from 20 to 40% load.

Mercruiser is the inboard marine engine division of Mercury Marine. The typical Mercruiser engine is an inline 4-cylinder, V6 or V8 engine produced by General Motors and based on existing automotive engine designs. However, during the 1980s, Mercruiser designed and built an engine that was not a pre-existing automotive engine.
