direct flash. Guide Number simply is the multiplied product of (flash distance x f/stop) for a proper exposure situation (normally specified for ISO 100).

Compare Power Rating of Camera Flashes with Guide Numbers
Using an optional flash unit such as the Nikon SB-400 or SB-900 makes it possible to achieve optimal exposure at greater distances than with the built-in flash. We recommend using an optional flash unit when taking photographs at weddings and in other situations in which you may frequently be taking photographs at a distance from the subject.

webdisk.bajanusa.com

If you look at the advertised Guide Numbers, you can see that SB-500 has a GN of 24, and SB-700 is rated at 28. Typically, Nikon specifies the Guide Numbers for its flashes at 35 mm flash zoom. Speedlight SB-500, however, is fixed at 24 mm, whereas SB-700 has a zoom head. So, to have a fair comparison, we need to look at the numbers for the same frame coverage. At 24 mm, the bigger Nikon SB-700 actually outputs

Debunking the common misconception that a flash is only necessary in low-light situations, this DVD guide provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more dynamic and visually interesting. Beginning with an introduction to the basic characteristics of light—the quality and diffusion of light, the direction

Read Free Nikon Sb 700 Guide Number

of the light, and the color of the light—it goes on to discuss aperture, shutter speed, and ISO and their relation to Nikon flash systems. After teaching how to master these fundamentals, the DVD discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations.
