general lack of power. The problem may occur when the engine is hot or cold or when you are low on fuel.

How to Troubleshoot Engine Problems by Sound

A whining noise when an engine is running is usually an indication of a

Get Free Noisy Car Engine

bearing that is on the verge of failure. This noise will increase as the engine RPMs increase. Remember, though, that there are multiple places in the engine where bearings are used. Thus, there are several items under the hood that can make this kind of whining sound.
