• Apply pesticides (including organic and 25b products) on the property of any Oregon pre-kindergarten, public and private K-12 schools, community colleges, federal Head Start programs, Oregon School for the Deaf, Oregon Youth Authority residential academy, or education service districts

These guidelines have been prepared to offer practical help and guidance to all those involved in using pesticides for food and fibre production as well as in Public Health programmes. The guidelines in this document cover the application of pesticides using aircraft, including the activities on the ground in support of the aerial application .

Weed Management Handbook updates the 8th edition of Weed Control Handbook (1990). The change in the title and contents of the book from previous editions reflects both the current emphasis on producing crops in a sustainable and environmentally-friendly manner, and the new weed management challenges presenting themselves. This landmark publication contains cutting edge chapters, each written by acknowledged experts in their fields and carefully drawn together and edited by Professor Robert Naylor, known and respected world-wide for his knowledge of the area. The sequence of chapters included reflects a progression from the biology of weeds, through the underpinning science and technology relating to weed management techniques including herbicides and their application to crops, leading to principles of weed management techniques. Finally a set of relevant case studies describes the main management options available and addresses the challenges of reduced chemical options in many crops. Weed Management Handbook is a vital tool for all those involved in the crop protection / agrochemical industry, including business managers, horticultural and agricultural scientists, plant physiologists, botanists and those studying and teaching BASIS courses. As an important reference guide for undergraduate and postgraduate students studying horticultural and agricultural sciences, plant physiology, botany and crop protection, copies of the book should be available on the shelves of all research establishments and universities where these subjects are studied and taught. Weed Management Handbook is published for the British Crop Protection Council (BCPC) by Blackwell Publishing.

Learn how to achieve top yields to maximize profits. This 2011 edition offers the latest information and strategies for alfalfa establishment, production, and harvest. Includes many color photos and charts.

The purpose of the Guide is to support national plant protection organizations (NPPOs) who wish to establish and maintain pest free areas (PFA) including places and/or production sites (PFPP and PFPS) as well as areas of low pest prevalence (ALPP). To facilitate an understanding of the processes to establish and maintain PFAs and ALPPs, a diagram in the form of a decision tree was constructed that identifies and outlines five general phases of programme development as follows: initiation, feasibility, establishment, maintenance, and market access phases. The guide is then divided into corresponding sections that describe what the key elements of each phase are, why these elements are important, what some of the common challenges and pitfalls are, and factors that may influence the success of the different phases such as budget stability, public outreach, availability of good survey and control tools, and open engagement with stakeholders and trading partners. By providing a deeper understanding of the factors that should be considered when establishing a PFA, PFPP, PFPS or ALPP the guide aims to overcome the challenges and maximize the impact of these efforts to the benefit of all parties. The guide concludes by providing a number of case studies from around the world that highlight successful PFA and ALPP programmes and how they deal with particular key issues. This guide contains current experience and the most advanced phytosanitary procedures in the implementation of PFA and ALPP, however, it is subjected to revision and updates as new developments are made available.
