This workbook serves as a computer programming supplement to Physics for Scientists and Engineers by Fishbane, Gasiorowicz and Thornton. The workbook contains 32 sections, each with a computer program written in MATLAB, that illustrate topics from the textbook. Each section reviews the relevant physics and describes how the program works.

Overview. Appropriate for both scientists and engineers. A comprehensive introduction to calculus-based physics which presents balance between theory and applications, between concepts and problem-solving, between mathematics and physics, and finally, between technology and traditional pedagogical methods. Maintains theoretical coverage, but supplements it with applications boxes, on topics such as: timed traffic lights, jet engines,
