Il mondo cambiato, siamo bombardati di informazioni in modo costante per tutto l'arco della giornata. Tv, radio, social network, email. Nel libro del 1986 "The cult of information", Theodore Roszak afferma che una persona inglese di ceto medio del 1600 aveva a disposizione nell'arco della sua intera vita meno informazioni di quante ne contiene oggi una singola copia del New York Times. E il 1986 era un'era preistorica paragonata ad oggi considerando l'accesso alle informazioni che abbiamo. Internet non esisteva, cos come i social. Districarsi in questo mare di informazioni diventato un compito molto arduo. difficile trovare contenuti di valore, e spesso questi sono contornate da informazioni meno importanti con il solo scopo di "fare volume". Da qui nasce l'idea delle pillole, un concentrato di informazioni riguardanti il business e la crescita personale, dritti al punto e senza giri di parole. Questo libro contiene 60 capitoli, 60 pillole che ti faranno riflettere e, perch no, dubitare di quello che credevi di sapere! Puoi

#1 Wall Street Journal Bestseller Instant New York Times Bestseller A game-changing approach to marketing, sales, and advertising. Seth Godin has taught and inspired millions of entrepreneurs, marketers, leaders, and fans from all walks of life, via his blog, online courses, lectures, and bestselling books. He is the inventor of countless ideas that have made their way into mainstream business language, from Permission Marketing to Purple Cow to Tribes to The Dip. Now, for the first time, Godin offers the core of his marketing wisdom in one compact, accessible, timeless package. This is Marketing shows you how to do work you're proud of, whether you're a tech startup founder, a small business owner, or part of a large corporation. Great marketers don't use consumers to solve their company's problem; they use marketing to solve other people's problems. Their tactics rely on empathy, connection, and emotional labor instead of attention-stealing ads and spammy email funnels. No matter what your product or service, this book will help you reframe how it's presented to the world, in order to meaningfully connect with people who want it. Seth employs his signature blend of insight, observation, and memorable examples to teach you: * How to build trust and permission with your target market. * The art of positioning--deciding not only who it's for, but who it's not for. * Why the best way to achieve your goals is to help others become who they want to be. * Why the old approaches to advertising and branding no longer work. * The surprising role of tension in any decision to buy (or not). * How marketing is at its core about the stories we tell ourselves about our social status. You can do work that matters for people who care. This book shows you the way.

A deeply moving story of the beauty and brutality of life, and death, on the world's most unpredictable and perilous mountain. Sitting just lower than Everest at 8,611 meeres above sea level on the China-Pakistan border, the Savage Mountain claims the lives of even the most experienced climbers. Alongside severe altitude, the weather is notoriously volatile and the climb relentlessly steep. A staggering one in four attempts result in death on the mountain. In One Man's Climb, Adrian Hayes details an intensely personal account of his attempts to climb K2 – first in 2013 and again in 2014. Absorbing and self-reflective, his journey is as much a story of climbing a mountain as it is a testament to the human spirit's ability to endure.

After years of war against terrorism, led by the United States and his allies, mainly against Al Qaeda and its international network, today the West is in war with an enemy of a very different caliber and capabilities: the ISIS. With a strong and prosperous economy, advanced media, well-equipped troops and an unusual ability to proselytize among young Western Muslim and elsewhere, today the Islamic State is the biggest threat to the future of our society. In this book we analyze various aspects of the ISIS universe, from origins to key people, allies, economics, the media, the foreign fighters, to decipher the next targets of the Caliphate. It also analyzes the war against terrorism conducted by the West, not failing to mention the gaps and uncertainties that have characterized the last years, and trying to define future guidelines of the fight against Islamic fundamentalism.

When the word 'computer' entered the general vocabulary in the 1950s, the most advanced example filled a reasonable sized room. Three decades of rapid technological revolution have resulted in the acceptance of computers in nearly every office, school and home. A corresponding dramatic rise in the status of 'information' has promoted the people who manipulate it from the status of office clerks to information scientists. Despite the wonderful claims for the abilities of the computer and the hallowed tones of 'computerese', Theodore Roszak dares to suggest that perhaps, like the unfortunate emperor, the computer has been overdressed with false claims made by those with something to gain by it - elements in our society that are making some of the most morally questionable uses of computer power. Roszak challenges the reader to ask: "Is our capacity to think creatively being undermined by the very 'information' that is supposed to help us? Is information processing being confused with science or even beginning to replace thought? And are we in danger of blurring the distinction between what machines do when they process information and what minds do when they think?" He explains why humankind's primary beliefs, in equality, justice and in God are not computable; why great scientific theories and fundamental 'master ideas' cannot be developed by computers; and why bad ideas cannot even be refuted by them. Roszak is no contemporary Luddite - this book was written on a word processor - but he is deeply concerned that we have all been sold a misleading and potentially harmful vision of the computerised society.

"It s beautifully presented, the text is light and informative, and the print quality of the book is top-notch."

A critical analysis of China's intelligence activities to include espionage, economic espionage, covert action, and export violations. This work is the most detailed work ever published in the unclassified world on China's intelligence tradecraft. It includes analysis of 595 cases of espionage, economic espionage, covert action, theft of technology and trade secrets. The study identifies and analyzes the specific espionage tradecraft used by China's intelligence services, State Owned Enterprises, private companies, and individuals. This is the first in a series of monographs on 'Chinese Intelligence Operations'. Each (5k - 10k) will focus on a specific aspects of China's espionage.

It's early morning on New Year's Eve, and 9-year-old Massimo wakes up to a long, doleful cry and the disconcerting image of his dad being supported by two strangers. Inexplicably, his mother has disappeared, leaving only a vague trail of perfume in his room and her dressing gown bundled up at the foot of his bed. Where has she gone? Will she ever come back? And will Massimo be able to say sorry, after quarrelling with her the night before?

FINALIST at 2015 LONDON BOOK FAIR's THE WRITE STUFF prize. Can a non-fictional book be as interesting as a page-turner fictional plot?Can it be at the same time a tycoon's biography, a mafia tale, a gangster story, a political thriller, an essay on democracy, a dystopia, a sociological analysis of a nation, a scandalous sex story? If the subject-matter is Silvio Berlusconi's incredible story and Italy, the

answer is yes. This book, in fact, is a unique portrait of Italy's godfather and also a detailed picture of Italian society, an attempt to allow the foreign reader to understand how it has been possible for an alleged mafia-linked business magnate and media tycoon, constantly in trouble with justice and drenched in vice, to become the most popular political leader, Prime Minister and the absolute master of the country for the last twenty years. Berlusconi is often considered the personification of corruption, of disrespect for the law, of the liaison between organized crime - politics, of immoral behaviour, typical features of that 'immoral majority' of the country. Still, there are many open questions that this book tries to answer: How come Berlusconi grabbed complete control of all Italian information and used it as a Weapon of Mass Deception that turned viewers into faithful voters? How was he able to pass laws ad-personam that made him almost untouchable by the Judicial Power and favoured his business and financial activities in an unfair game? Can we say that Berlusconi is the very symbol of a concentration of political, economic and media power in one single person never seen before, a fact that has created the greatest conflicts of interests in the Western World, or is he just another pawn in a bigger game? What is hidden under Italy's well-known surface beauty, artistry and creativity? Does Dante's underworld Inferno still exist today? Is the erosion of democracy in Berlusconi's period a trend of modern capitalism, as some 'dystopian' writers predicted?
