This book constitutes the thoroughly refereed post-workshop proceedings of the Third International Conference on Flexible Query Answering Systems, FQAS'98, held in Roskilde, Denmark, in May 1998. The 32 revised papers presented were carefully reviewed and went through two rounds of selection for inclusion in the proceedings. This book is the first one focused on flexible query answering systems; this emerging area of research and development builds on results from mathematical logic, fuzzy logic, various database paradigms, information retrieval, linguistics, and human computer-interaction. The papers deal with issues occurring in querying databases and the Internet.

The simulation model PLANT-PC was developed to aid forest managers in Ontario with their forest renewal problems. The model treats the regeneration process as three separate but interdependent phases of stock production, stock storage, and plantation establishment. During each phase, growth and/or survival of seedlings are simulated according to empirical submodels reflecting the effects of various biological factors as well as management options. The model was calibrated for black spruce, white spruce, and jack pine plantations from the Nipigon, Geraldton, Hearst, Kapuskasing, Timmins, and Wawa districts of Ontario. Application of the model is demonstrated by presenting a detailed example. A simple procedure for calibrating the model to account for local or regional conditions is also provided.

Provides instructions for using the computer program which was developed under the research project, "The Economics of Reducing the County Road System: Three Case Studies In Iowa". This program operates on an IBM personal computer with 300K storage. A fixed disk is required with at least 3 megabytes of storage. The computer must be equipped with DOS version 3.0; the programs are written in Fortran. The user's manual describes all data requirements including network preparation, trip information, cost for maintenance, reconstruction, etc. Program operation instructions are presented, as well as sample solution output and a listing of the computer programs.
