availability while minimising maintenance costs. The key parameters tracked include engine interstage turbine temperature (ITT), high pressure spool speed (NH), low pressure spool speed (NL), and ...

Maintaining PW100 engine family values while being cost ...

The PW100/PW150 engine family is the benchmark for low fuel consumption on routes of 350 miles or less. That means they consume 25% to 40% less fuel and produce up to 50% fewer CO2 emissions than similar-sized regional jets. Our engines are also biofuel compatible. Airlines and governments count on the reliability and versatility of our engines to fly in many challenging environments. Overview ...
