There have already been several very successful books devoted to the original film in the Matrix trilogy. This entirely new collection of essays is the first book to examine the trilogy as a whole - as well as related products such as The Animatrix and the computer game. Contributors tackle these subjects from a range of perspectives: religion, philosophy, gender, race, film studies, and science, providing a comprehensive view of everything Matrix-related.Reviewing the cultural and religious implications of the trilogy, authors look at:* American Religion, Community and Revitalization: Why The Matrix Resonates* Religion and Salvation, the Optiate of The Matrix Franchise* Gimme that Bullet Time Religion, or, The Dream of Spiritually Perfect Violence* Ultimate Reality: Buddhist and Gnostic Constructions of BlissAlso covered are theories of cyberworlds, issues of gender and race and the games and ethics of simulation.

A practical guide for teachers to link phonemic awareness (hearing sounds in words) with phonics (the visual details of print).

This is the extraordinary story of Knight and Lomas's fourteen year quest to uncover the secret teachings buried beneath Roslin Chapel near Edinburgh. Their quest ends with extraordinary revelations about early human history - the origins of Christianity, of Freemasonry and of science. They show that all were charged with a belief in a secret cosmic code, linking, for example, the Exodus from Egypt, the founding of Solomon's Temple and the Star of Bethlehem. This book reveals for the first time why there were such high expectations of a Messiah at the time of the birth of Jesus Christ. The Book of Hiram will change everything you thought you knew about both the Bible and Freemasonry.

This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

Verbal descriptions of life have been around for centuries, but the digital age has made access to those descriptions even more important. Dr. Joel Snyder, an audio description pioneer, has created a book and website offering the first overview of the field, including its history, application to a range of genres, description of training techniques, and list of resources. Audio description brings the visual world to life, making theater productions, television shows, films, visual art and events accessible to people who are blind or have low vision. Describers employ succinct, vivid, imaginative words to convey visual images those with sight take for granted. Although countries worldwide have taken up the cause, the United States has fallen short on research and institutions to study the field. Dr. Snyder's book helps fill in some of those gaps. "For decades, Joel Snyder has combined his astonishing command of language with his keen attention to detail to create word pictures that stir the mind's eye, especially for patrons of the arts whose physical eyes cannot see. [...] His book has been long-awaited, and no doubt will become the standard for prospective audio describers around the world." -Kelsey Marshall, Founding Director of Accessibility, The John F. Kennedy Center for the Performing Arts, Washington, DC Dr. Joel Snyder is known internationally as one of the world's first "audio describers," a pioneer in the field of audio description, making theater events, museum exhibitions, and media accessible to people who are blind or have low vision. Since 1981, he has introduced audio description techniques in 36 states and D.C. and in 35 countries. He holds a PhD in accessibility audio description from the Universitat Autònoma de Barcelona. Dr. Snyder's company, Audio Description Associates, LLC (www.audiodescribe.com) uses audio description to enhance a wide range of arts projects including video and film, museum exhibitions, and live events. As Director of Described Media for the National Captioning Institute, he supervised the production of descriptions for Sesame Street and dozens of feature films and nationally broadcast television; his descriptions can be heard at Smithsonian Institution exhibits, the Getty Museum, the Albright-Knox Gallery, and throughout the country at National Park Service visitor centers. As Director of the American Council of the Blind's Audio Description Project (www.acb.org/adp), Dr. Snyder voiced description for network coverage of President Obama's inauguration in 2009 and 2013, and recently produced the first-ever audio-described tour of The White House. The ADP website is the nation's principal provider of information and resources on audio description.
