Solving the Immigrant Church Crisis: The Biblical Solution of Parallel Ministry (Acts 6:1-7) addresses the crisis of the immigrant church in which complex cultural and linguistic factors create a reticence on the part of immigrants to transfer financial and decision-making authority to succeeding generations, and this results in a culturally irrelevant ministry to those generations, an exodus of believers from the church, a spiritually immature remnant, and an inability to reach the lost. The thesis of this book is that parallel ministry, based on Acts 6:1-7, is the biblical solution to the crisis in the immigrant church. While there are at least two main aspects of this crisis, a spiritual-relational and an ecclesiastical aspect, this book focuses on the ecclesiastical aspect of defining the biblical structure of church government. Specifically, this book is for immigrant churches primarily in the United States and offers them a biblical and practical solution to the problem plaguing them for over two centuries of how to minister effectively to the succeeding generations.

Dedicated to an articulation of the earth from broadly ecological perspectives, eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues. In Landscape into Eco Art, Mark Cheetham systematically examines connections and divergences between contemporary eco art, land art of the 1960s and 1970s, and the historical genre of landscape painting. Through eight thematic case studies that illuminate what eco art means in practice, reception, and history, Cheetham places the form in a longer and broader art-historical context. He considers a wide range of media—from painting, sculpture, and photography to artists' films, video, sound work, animation, and installation—and analyzes the work of internationally prominent artists such as Olafur Eliasson, Nancy Holt, Mark Dion, and Robert Smithson. In doing so, Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today's debates on climate science, government policy, and our collective and individual responsibility to the planet. An ambitious intervention into eco-criticism and the environmental humanities, this volume provides original ways to understand the issues and practices of eco art in the Anthropocene. Art historians, humanities scholars, and lay readers interested in contemporary art and the environment will find Cheetham's work valuable and invigorating.
