Fifty Places to Ski and Snowboard Before You Die-the 10th book in the popular Fifty Places series-takes readers to some of the world's most inspiring skiing/snowboarding destinations: the Chugach Mountains (Alaska); Aspen, Crested Butte, and Steamboat Springs (Colorado); Tuckerman Ravine (New Hampshire); Rusutsu (Japan); ChamoniX (France); Portillo (Chile); and Whistler Blackcomb (British Columbia). Based on interviews with leading experts, the book chronicles the rich history of these sports and the people who have mastered them, including Tommy Moe, Jonny Moseley, Billy Kidd, and Greg Harms. Above all, Santella provides readers with the gorgeous scenery, the glamorous ambiance, and the always thrilling experience of visiting mountains from the Alps to the Rockies, whether it's apr\u00e8s-ski in Cortina or helicopter rides into virgin Alaskan powder. Praise for Fifty Places to Ski and Snowboard Before You Die "Even the reader who gets no farther than the couch can feel transported to the snow-covered peaks, mogul fields, and sparkling expanses sculpted by the book's avalanche of quirky nuggets, insider tips, and historical perspectives . . . After writing nine other Fifty Places guides, author Chris Santella has the drill down." -Reuters.com "Whether you're an expert looking to hit the double diamond moguls or a beginner who wants a gentle slope just in case stopping is an issue, these spots have a little something for everyone." -The Daily Beast "For powderhounds, Fifty Places to Ski & Snowboard Before You Die by Chris Santella (\$25) looks at snow sports destinations around the world." -Associated Press

The field of adapted physical education and sport has undergone numerous changes in recent years. This new edition of Adapted Physical Education and Sport will help you stay on top of those changes and, in doing so, provide the highest-quality physical education and sport opportunities for students with disabilities. NEW MATERIAL The sixth edition of this well-loved text builds on its successful previous editions and is replete with changes that are current with today's trends and practices in the field: • As the inclusion movement continues to expand, the authors have revised several chapters to detail relevant inclusion practices and applications in both physical education and sport, helping to integrate students with disabilities into regular class and sport settings with guidelines for modifying activities. • The chapter on adapted sport is further developed to communicate and reflect on progress in the field and includes a Sport Framework for Individuals with Disabilities model to help develop and implement sport programs. • The book gives attention to the revised Brockport Physical Fitness Test, and the accompanying web resource offers video clips that explain and demonstrate the criterion-referenced health-related tests that are applicable to many students with disabilities. • Advances and applications pertaining to behavior management and wheelchair sport performance are covered in various chapters. • The authors address the use of new technology as it relates to teaching and administration for adapted physical education and explore stand-alone apps that can be used in conjunction with the book that are useful in behavior management, fitness development, communication, social interaction, and physical education activities. • The authors give increased attention to the problem of obesity, particularly relevant to students with disabilities. • Many new authors and a coeditor have been brought on board, bringing fresh perspectives to the book and adding to the depth of experience provided by the returning authors and editor. These additions help Adapted Physical Education and Sport maintain its reputation as a comprehensive, user-friendly text that helps teachers provide top-quality services to people with unique physical education needs. Greatly influenced by the Individuals with Disabilities Education Act, this book helps in identifying the unique needs of students and developing physical education programs, including individualized education programs (IEPs) for students with disabilities, that are consistent with current federal legislation. STRONG ANCILLARIES The text is augmented by its ancillaries, which include an instructor guide, test package, presentation package, and web resource with video. The instructor guide offers chapter objectives, additional resources, and learning and enrichment activities that will help students master the content and extend their knowledge. The test package helps in building custom tests using hundreds of test questions and answers. You will find hundreds of PowerPoint slides that reinforce the text's key points in the presentation package, and the web resource includes 26 videos of the new Brockport Physical Fitness Test in action as well as several reproducibles from the book. DEEPENED UNDERSTANDING The authors, renowned authorities in their fields, use real-life scenarios to introduce chapter concepts and then show how to apply the concepts in solving issues. The text will help deepen understanding of the implications of disabilities for people through age 21 (though much of the book is relevant in the entire life span). It grounds readers in the foundational topics for adapted physical education and sport, explores the developmental considerations involved, and outlines activities for developing programs for people with unique physical education needs. The book offers a four-color design to draw attention to important elements and provides separate author and subject indexes as well as resources with each chapter and on the web resource for further exploration. Adapted Physical Education and Sport supplies all that is needed for enriching the lives of students with disabilities by providing them with the high-quality programs they deserve.

Snowboarders quickly learn which mountains are best to board and what type of snow is required for the optimum ride. In this volume, readers will learn all about snowboarding, starting with the fundamentals of this thrilling winter sport. The life of a professional snowboarder is also examined.

Gain Without Pain. Learning to snowboard can be easy and painless-with the right instruction. In this groundbreaking book, Danny Martin, the most sought-after snowboarding instructor today, teaches you how to snowboard in just three days-and without falling. While the American Association of Snowboard Instructors tells its members, "Your students will fall," Danny Martin shows you that there can be gain without pain: he has single-handedly revolutionized the way the sport is taught, and in No-Fall Snowboarding he reveals his techniques. Firmly grounded in physical fitness and martial arts and designed so everyone-beginners, skiers, even seasoned snowboarders-can practice at home, No-Fall Snowboarding will teach you how to: -Learn proper snowboarding techniques long before hitting the mountain -Create balance with easy, specific body movements -Find the perfect board, gear, places to board -Get over bad habits -Avoid typical twisting motions guaranteed to cause falling Filled with dozens of stunning photographs by renowned photographer Mark Seliger, No-Fall Snowboarding is the go-to guide for people of all ages and skill levels who want to learn America's fastest growing sport.

* Challenging routes for intermediate and advanced backcountry skiers and snowboarders * Includes many Washington tours easily accessible from the Seattle area * Includes backcountry day and multi-day tours * Illustrated with 80 photos and 80 maps With more than 100 backcountry Washington routes and tours for intermediate to advanced alpine skiers and snowboarders, Burgdorfer's guide was for many years the only reference to these adventures. Each trip description details the best times to go, including year-round opportunities, access, starting elevation and high point, tour length and time, maps, level and type of skill required, and permit information. Special sections cover avalanche conditions, snow survival, environmental considerations, weather, equipment, and techniques. A seasonal cross-reference table helps readers select tours by season.

Whether you're an experienced backcountry skier or intermediate snowboarder looking to ramp up your out of bounds expeditions, Brittany and Frank Konsella have the cred to guide you to the state's special runs. Both have descended all of the state's 14ers on skis and Brittany was the second woman to accomplish that feat. They know where the sweet lines are. Backcountry Ski & Snowboard Routes: Colorado-part of the popular series-includes backcountry routes focused on the Front Range and the San Juans, with other routes in the Sawatch Range, Elk Mountains, Mosquito Range, and more.
