may seem immaterial to the abstract dilemma. The question of formulating a general principle that can account for the differing moral intuitions in the different variants of the story was dubbed the "trolley problem" in a 1976 ph

~~Trolley problem — Wikipedia~~
The Trolley Problem sets up a moral dilemma in which one is to decide whether to steer the trolley in the first scenario, and whether to push the fat man off the footbridge in the second, so that one person dies as opposed to five. Those are the only options available.

~~A two-year-old's solution to the trolley problem — YouTube~~

The trolley problem is a question of human morality, and an example of a philosophical view called consequentialism. This view says that morality is defined by the consequences of an action, and that the consequences are all that matter. But exactly which consequences are allowable? Take the two examples that make up the trolley problem.
