Water Treatment Plant Design - American Water Works ...

In terms of water treatment, including water purification and sewage treatment,

File Type PDF Water Treatment Plant Design 4th

backwashing refers to pumping water backwards through the filters media, sometimes including intermittent use of compressed air during the process. Backwashing is a form of preventive maintenance so that the filter media can be reused. In water treatment plants, backwashing can be an automated process that is run ...

Backwashing (water treatment) - Wikipedia
Filtration practices employed in water treatment plants produce large volume of wash water containing a low concentration of

File Type PDF Water Treatment Plant Design 4th

Edition
suspended solids, ranging from 30 to 400 mg/l, depending on the turbidity of the treated raw water and the amount of recycled backwash water. The backwash water volume is usually 2-3% of the treatment plant flow.
