If a gas weed eater is stored on its side, the engine may have flooded. Let it rest for at least 15 minutes before starting it up again. An electric weed eater should also be stored upright in order to protect the parts from damage due to dust and debris from the ground traveling into the delicate parts of the machine.

The best weed eater works to cut grass, weeds, and other vegetation and places that are difficult to access with other tools like lawn mowers. All weed wackers utilize a centrifugal force to spin a line made of monofilament, nylon, or in some cases chain. The speed of the spinning action creates enough force to slice the tops off of grasses and weeds and even slender woody stems.
