PM, Gerald Combs wrote: Hi everyone, I've scheduled the next remote Developer Den for Wednesday, July 28th. This is the remote version of the Developer Den at SharkFest, a room that is set aside for ...

Wireshark-dev: Re: [Wireshark-dev] Remote Developer Den, July 2021

TCP dissector - Erroneous DSACK reporting Issue 17315. No wlan_radio.duration calculated for PHY type: 802.11ac (VHT) Issue 17419. NAN Dissector has wrong minimum length for availability attribute ...

Wireshark 3.4.7 Release Notes

It may be possible to make Wireshark crash by injecting a malformed packet onto the wire or by convincing someone to read a malformed packet trace file.

wmpa-sec-2021-06 - DNP dissector crash

Hi everyone, I've scheduled the next remote Developer Den for Wednesday, July 28th. This is the remote version of the Developer Den at SharkFest, a room that is set aside for office hours where ...

Wireshark-dev: [Wireshark-dev] Remote Developer Den, July 2021

packet-ppcap.c needs the same change that was done for vss in https://gitlab.com/wireshark/wireshark/-/merge_requests/3526 It's a minor change but I would like to ...

Wireshark-dev: [Wireshark-dev] Ericsson pcap sample capture

In my opinion checksum 0xc343 is actually correct, since it is calculated using the final destination address 4ea1:2222:2222::11, but wireshark reports 0x2e12 as correct, which is the result of the ...

Wireshark-dev: [Wireshark-dev] Incorrect checksum calculation for UDP packet with ipv6 extensio

The final destination address for the packet is 505:505:505:505:505:505:505. Why would you think it is not? When the kernel is routing the packet (at 4ea1:2222:2222::11) it does not look at the ...

Wireshark-dev: [Wireshark-dev] Wireshark 3.4.7 is now available

Based on the 0xxxxxxx of your example and references like [1], I believe the masks are correct. MIDI seems to mostly use seven bit bytes schmucked together for some reason, so ignoring the high bit of ...

Wireshark-dev: Re: [Wireshark-dev] RTP-MIDI strange field masks?

I haven't actually looked at the code, so it's possible we're doing the masking but not actually combining the bits into a single 14-bit value properly still. I wouldn't expect a simple mask value to ...

Wireshark-dev: Re: [Wireshark-dev] RTP-MIDI strange field masks?

Looking at an example in RFC 4695 (Song Position Pointer) I think this (on page 157) is saying that is it just a 2-byte field (and should therefore have a non-mask of ...

Wireshark-dev: [Wireshark-dev] RTP-MIDI strange field masks?

> If some changes were done to fix the compilation, it means that some people still use a libgcrypt version older than 1.6.0. > And as seen in our CMakeLists.txt file ...

Wireshark-dev: Re: [Wireshark-dev] Can the legacy HAVE_LIBGCRYPT_AEAD check be removed?

> The minimum version being stuck at 1.5.0 is, I believe, almost entirely due to RHEL/CentOS 7 being stuck at 1.5.3 > (https://gitlab.com/wireshark/wireshark/-/wikis ...

Wireshark-dev: Re: [Wireshark-dev] Can the legacy HAVE_LIBGCRYPT_AEAD check be removed?

I've been thinking recently about starting the process of getting rid of the "global" wmem scope methods (wmem_packet_scope, wmem_file_scope, etc) in favour of passing them around in arguments (or in ...

Wireshark-dev: [Wireshark-dev] Replacing wmem_packet_scope() with pinfo->pool?

(change would be: https://gitlab.com/wireshark/wireshark/-/merge_requests/3526) ah - packet-ipsecc.esl - packet-esl.c fcoe - packet-fcoe.c flip - packet-flip.c htcp2 ...

Wireshark-dev: [Wireshark-dev] Dissector cleanup for multiple protocols

Seems perfectly fine to me. This dates back to MIDI over serial line where the most significant bit indicates realtime event. Realtime events can appear anytime on the serial line. Normal ...
