In this book, we will discuss how to communicate with the 72 angels that are associated with the 72 names of God in volume 1 of this series. We will not be using any fancy and complicated rituals. With all due respect to those who plan elaborate rituals, the rituals end up being more of a distraction. The angels do not require certain hours of day or

night or certain colors or garb. They are not human that they require such trivialities. Do you think an angel with a limitless mind requires such limited and minute actions to get its attention? I know this may completely contradict what you have heard, but logically, this is so. If you are looking for elaborate rituals, you will be disappointed in this book. This book is for people who want a direct connection. Not those who wish to mire themselves in complexity that in actually, is contrived. We know where many of those rituals in all those Grimoires come from and I assure you, the complexities are formalities only and not necessary for deep connection with these angels. With that, In this book, we will go into the significance of the 72 names of God and then proceed to the names of the angels. And finally, how to call upon them to help you.

This fully revised and updated book, now in its Fourth Edition, continues to provide a comprehensive coverage of data communications and computer networks in an easy to understand style. Audience Intended primarily as a textbook for the students of computer science and engineering, electronics and communication engineering, master of computer applications (MCA), and those offering IT courses, this book would also be useful for practising professionals.
